Counter Punch	D	Draws		0	Knock Down #s	See the Knock Down #s chart below the Punches level chart.			
Stick and Move	D	KO		0	Remember that your fighter gets 1,500 initial points to spend on anything he wants.				
Punches Level					Career Earning Chart				
Every created fighter starts out with the level one punches					Accomplishment			Points Earned	
Level	1PT	2PT	3PT	4PT	Every round of boxing			50	
Level 1	40	45	5	10	Win			500	
Level 2	35	40	10	15	Knock Out			250	
Level 3	30	35	15	20	Knock Downs			100	
Level 4	25	30	20	25	All you need to do is start a round and you get the 50 points. Once the bell rings and you start the next round you are awarded 50 points. If you fight 10 rounds you would earn 500 points. If you win with a knockout you would get all three scores. 500 points for the win, 250 points for the knock out and 100 points for the knock down. For example, if you knock a fighter out in the first round the first time he does down, you would earn a total of 900 points for the fight. No matter what happens a fighter can not earn any more than 1,500 points in any single fight. If you went 12 rounds, and scored 5 knock downs and won by KO, you should get a total of 1,850 points, but that gets changed to 1,500. You can never earn more than 1,500 points from any one fight or less than 50 points.				
Level 5	20	25	25	30					
Level 6	15	20	30	35					
Level 7	10	15	35	40					
Knock Down Numbers									
Your fighter gains Knock down numbers each time his Knock Out Rating reaches certain points. Add another KD number when his KO rating reaches, 20, 30, 40, 50, 60, 65, 70, 75, 80 it maxes out at 10 #s.
